SEO is not a cost but an investment with a high ROI. By tying in SEO to Web analytics data, you may observe certain keywords having great conversion rates for which you rank only on page #2 on Google and know that you're leaving money on the table.

Lifting your rank to the top 3 spots on the first page, where most clicks go, can provide a massive return on your modest investment into SEO. It's why SEO has been likened to investing in Real Estate – the returns can be truly stupendous when you get it right.
